Written Especially for This Paper by the Pathous American League Umpire. NAP BUCKER, famous southpaw of the Brooklyn National league, has a long list of pitching records to his credit. No doubt, Rucker would have shined to greater advantage had be been fortunate enough to have been with the New York Giatts or some other first division club. Despite the fact that his work has been much feared in the National league, and has performed a number of brilliant exhibitions.

Shart Out Beston on September 5, 1986, Rucker came through with what he haturally regards as his very best pitching performence. He shut out the Bestonians without a hit or run. His control was perfect, and had it not been for three errors on the part of his fram mates, he would have joined the rery select class of his leanue pitchers are freeling believe by their remm mates in keeping the opposition off the bases. Often a pitcher is hit hard enough to be beaten, yet is saved by fast fielding. Often pitchers are credited with no hit games when have worked contests in which not many games pitchers are greatly lighed by their remm mates in keeping the opposition off the bases. Often a pitcher is hit hard enough to be beaten, yet is saved by fast fielding. Often pitchers are credited with no hit games when only the most sensational fielding has aveal them. In this contest Rucker was at his very best as shown by his strikeout record of

The Goodrich Tire, like the trained athlete is all brawn and muscle-no fat

HE old Olympic Game promoters were great for what we call "form." Symmetry, proportion, soundness and proper balance out-bid bulging muscles for favor-yes, and out-won, too, just as they will

Mere bulk never was synonymous with endurance-and the truth of this statement drives home with a bang, when you apply it to tires. . . .

IF thick, heavy tires were the last word in tire construction, we could wipe out of existence a Goodrich Research and Test Department employing seventy people. We would take off the road a battalion of ten automobiles, that run twenty-four hours a day and every day in the year, grinding tires of all makes to pieces, just for the sake of information. to us and eventual economy to the user of

There is where we learn to cut out of a tire the material which gets the user nothing. Of course, when we stripped tire price lists

of their padding—fictitious values—we expected rivals to say we had stripped our tires.

'T was their only "come-back." They had to say that, in stripping down prices to the point where they were fair to dealer and consumer and left no room for injurious price-cutting factics, we had stripped our tires 0 0 0

THE Goodrich Tire, like the trained athlete, is all brawn and muscle—no fat. It represents an achievement the ability to cut out the extra costs of manufacture, the extra costs of labor, of extra, needless material, and to give you the best, long-mileage, high-standard tire in the world.

There are padded tires as well as padded

Don't pay for padding. Now don't forget this—we are talking in the main about Goodrich Safety Tread Tires, for they represent ninety per cent of our factory output for resale.

Furthermore, while we have put the padded prices on smooth trend tires on the run, the evil of padded prices on non-skid tires still is in evidence, as shown in table below:
